

Dart talk Notes:

According to Wendy Conway:

1) Marvin felt that I had convinced him that Navro's notes were not enough good & that "symbolic representation was imp" — I don't think of phasing it that way

2) That I was strong proponent of doing very easy problems as opposed to most OR that wanted to do hard problems to show that

their ~~enough~~ ~~notes~~ were actually useful (Re ~~the~~ "done to sponsor" problem.)
